

24 Hours of Lemons Race Background

24 hours of Lemons is a 24-hour endurance race to see which car will be the last one standing. The car that completes the most laps is ultimately the winner. Each team will need to purchase a vehicle for \$500 or less, including any performance modifications added to the vehicle. The team must also complete their project following the extensive list of 24 Hours of Lemons technical rules. We will be working on a 2008 Ford Fusion to complete our project. This will be a year long project and all tasks and requirements will be assigned weekly. If we were to compete in the 24 Hours of Lemons
